PROFESSIONAL SUMMARY

BSIT student at Cebu Eastern College Incorporated, aspiring to work as a back-end developer. I am comfortable building web applications with Django, including user accounts, database models, and admin tools, and I am building up my Python skills. I have published my projects on GitHub, and I also enjoy making small games. I am looking for an entry-level opportunity to learn from a team and grow as a back-end developer.

PROJECTS

Gamio: Django Teacher Dashboard github.com/JhonAusten/gamio_build

- Web app with teacher sign-up and sign-in, student and quiz records, lesson file uploads, scores and leaderboards, and a Django admin panel.
- Each teacher can only see their own students and quizzes.
- Back-end in Python (Django). Used Claude AI to help map out how the entities relate and how the API calls work.

Random Quotes Generator jhonausten.github.io/SIA-API-project

- Web app that shows random motivational quotes. Back-end API work and JavaScript. JavaScript, working with a quotes data file

Browser Games: Manananggal Slayer and Car Racing github.com/JhonAusten

- Built a car racing game with HTML and JavaScript, and worked on sprite animation for a Filipino horror game in JavaScript.

RPG Maker MV Game (in progress) Personal project

- Building a role-playing game with a multi-island world map, currently working on the storyline.
